

HOW TO TAKE CARE OF THE RAINCOAT JACKET "FROM LVIV WITH RAIN"?

The fabric has a polymer coating so it requires special care. If there is a stain, clean the raincoat only with a **soft** sponge or a **napkin soaked in soap solution** having neutral pH (e.g. toilet soap).

After cleaning, the surface should be **wiped with a wet napkin** to remove detergent residues. Then wipe the material dry. To preserve its original bright color, it is recommended to **clean the material once per month**.

Small but stubborn stains can be removed with the help of **25% (!) ethanol solution** by wiping gently the stains with a **soft** cloth. After the stain is removed, the surface should be wiped **with a wet napkin\cloth**. Then wipe the material dry once again.

! IMPORTANT !

Not all types of stains can be removed from the material surface. It depends on the following factors:

- if the stain occurred due to reactive dye which bonds tightly with the material surface;
- chemical composition of stains which penetrate deeply into the fabric structure;
- amount of time that has passed since the moment of staining.

It is strictly prohibited to use household detergents or artificial leather care agents for cleaning as they can enter into a chemical reaction with the stain and make the situation even worse.

Please, do use only the recommended cleaning methods described above.

USEFUL INFORMATION:

Our raincoat "From Lviv with rain" will definitely become a reliable friend to you.

During its production, the manufacture of Aviatsiya Halychyny applies the method of seam sealing which provides **99,9% protection** from rain. In other words, we care for your comfort.

In addition, we use a smooth cotton lining (**95% of cotton + 5% of spandex**) which prevents the formation of condensate even during long periods of movement. So, after active use of the raincoat, we recommend drying the garment by straightening it out (!).

The raincoat has **two pairs of symmetrical** pockets closed with outer "flaps". There is also an inside pocket for small but important belongings (phone, wallet, documents). You can find it on the left inner side.

In the hood, there is a paracord stripe – an extra strong cord that can be dragged out fully from the hood for your needs.

There is a branded plastic zipper with our logo.

On the sleeves and lumbar, there are little **fasteners** which allow you to comfortably fit the raincoat if needed.

Thank you for reading to the end. We are glad that you are with us and make the world brighter!
